IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
AS INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

International Application No. : PCT/US2004/009605
International Filing Date : 29 March 2004 (29.03.2004)
Earliest Priority Date : 28 March 2003 (28.03.2003)
Applicant(s) : C.R. BARD, INC. ET AL.
Title : IMPROVED BRAIDED MESH CATHETER

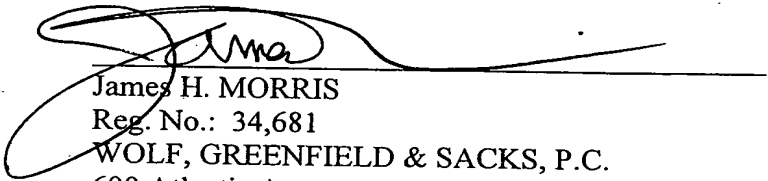

Mail Stop PCT
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Transmitted herewith for filing a Demand for International Preliminary Examination,
Amendments under Article 34 and Fee Calculation Sheet with Deposit Account
Authorization.

A check in the amount of \$923.00 is enclosed to cover the fee. If this is insufficient, please
charge any deficiency, or credit any overpayment in the total fees, to the account of Wolf,
Greenfield & Sacks, P.C., Deposit Account No. 23/2825.

If the enclosed papers are considered incomplete, the Mail Room and/or the Application
Branch is respectfully requested to contact the undersigned collect at (617) 720-3500, Boston,
Massachusetts.

Respectfully submitted,

James H. MORRIS

☐ **Address for Correspondence:** Mark this check box where no agent or common representative is/has been appointed and the space above is used instead to indicate a special address to which correspondence should be sent.

Box No. IV BASIS FOR INTERNATIONAL PRELIMINARY EXAMINATION**Statement concerning amendments:***

1. The applicant wishes the international preliminary examination to start on the basis of:

☐ the international application as originally filed

the description ☒ as originally filed to include the Rectification of Obvious Errors as filed on 01 July 2004
☐ as amended under Article 34

the claims ☐ as originally filed to include the Rectification of Obvious Errors as filed on 01 July 2004
☐ as amended under Article 19 (together with any accompanying statement)
☒ as amended under Article 34

the drawings ☒ as originally filed to include the Rectification of Obvious Errors as filed on 01 July 2004
☐ as amended under Article 34

2. ☐ The applicant wishes any amendment to the claims under Article 19 to be considered as reversed.3. ☐ The applicant wishes the start of the international preliminary examination to be postponed until the expiration of the applicable time limit under Rule 69.1(d).4. ☐ The applicant wishes the start of the international preliminary examination to start earlier than the expiration of the applicable time limit under Rule 69.1(d).

* Where no check-box is marked, international preliminary examination will start on the basis of the international application as originally filed or, where a copy of amendments to the claims under Article 19 and/or amendments of the international application under Article 34 are received by the International Preliminary Examining Authority before it has begun to draw up a written opinion or the international preliminary examination report, as so amended.

Language for the purposes of international preliminary examination: English

- ☒ which is the language in which the international application was filed.
☐ which is the language of a translation furnished for the purposes of international search.
☐ which is the language of publication of the international application
☐ which is the language of the translation to be furnished for the purposes of international preliminary examination.

Box No. V ELECTION OF STATES

The filing of this demand constitutes the election of all Contracting States which are designated and are bound by Chapter II of the PCT.

Box No. VI CHECKLIST

The demand is accompanied by the following elements, in the language referred to in Box No. IV, for the purposes of international preliminary examination:

- | | | | | |
|----|---|---|---|--------|
| 1. | translation of international application | : | | sheets |
| 2. | amendments under Article 34 | : | 2 | sheets |
| 3. | copy (or, where required, translation) of amendments under Article 19 | : | | sheets |
| 4. | copy (or, where required, translation) of statement under Article 19 | : | | sheets |
| 5. | letter | : | 6 | sheets |
| 6. | other (<i>specify</i>) | : | | sheets |

RESPONSE TO WRITTEN OPINION
AMENDMENTS UNDER PCT ARTICLE 34(2)(b)

Applicants hereby respond, pursuant to PCT Article 34(2)(b) and PCT Rule 66.3, to the Written Opinion mailed 3 January 2005 (03.01.05). The International Preliminary Examining Authority is requested to take into account the following remarks and amendments to the claims in drafting the International Preliminary Examination Report (IPER). Moreover, Applicants respectfully request, under PCT Rule 66.4, another Written Opinion and an opportunity to respond thereto, should the Examining Authority conclude that a favorable IPER cannot be issued.

LETTER UNDER PCT RULE 66.8 AND PCT INSTRUCTIONS SECTION 205(b)

Applicants submit the attached replacement sheets 52 and 60 for the original sheets with the same numbers, pursuant to Rule 66.8, and request the replacement sheets be substituted for the original sheets.

The status of the claims after the amendments is as follows:

Claims 2-65 Original.
Claim 1 Replaced by an amended claim.
Claims 66-70 Added.

REMARKS UNDER PCT RULE 66.3

Claims 1-65 were previously pending, of which claims 1-27 have been examined. Claim 1 has been replaced with an amended claim. Claims 66-70 have been added. All of the new claims are supported by the specification as originally filed, and no new matter is added. The application as now presented is believed to satisfy both the novelty and the inventive step requirements of Article 34(1) PCT.

A. Deferral of Certain Issues Raised in Written Opinion

Applicant acknowledges that several issues relating to formal matters are raised in the Written Opinion. For example, the Written Opinion states that contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in Documents D1 and D7 is not mentioned in Applicant's application. In addition, the Written Opinion states that the units "inches" and "French" employed on pages 9, 37 and 46 are not recognized in international practice, contrary to the requirements of Rule 10.1(d) PCT. Further, the Written Opinion states that the statement on page 51 results in a lack of clarity because it implies that the subject matter for which protection is sought may be different from what is defined by the claims. Because these issues are based on requirements that vary from country to country, Applicant wishes to defer resolution of several of these issues until national stage processing. Applicant thanks the Examiner for bringing the issues to Applicant's attention.

The Written Opinion also states that the claims lack unity of invention and that claims 28-37 and 49-53 relate to subject matter considered to be covered by the provisions of Rule 67.1(iv) PCT. Because the requirements relating to these objections do not apply in at least one of Applicant's designated jurisdictions (e.g., the United States), Applicant wishes to address these objections during national stage processing.

B. Novelty of Claims

The Written Opinion states that the subject matter of former independent claim 1 lacks novelty in view of document D1 (U.S. Patent No. 5,891,136). Applicant has amended claim 1 to clearly distinguish over D1 (as discussed below). The amendment to claim 1 is believed to be supported in the application as filed at page 39, lines 21-32, for example.

a. Overview of the Invention

One aspect of the present invention relates to the actuation of a braided conductive member of a catheter using a mandrel (page 39, lines 21-23). When the mandrel is slid distally within the shaft of the catheter, the braided conductive member assumes an undeployed configuration which may have a generally cylindrical shape (page 39, lines 23-25). When the mandrel is slid proximally within the shaft, the braided conductive member assumes a deployed configuration, which may have a disk-like shape (page 39, lines 27-29).

The braided conductive member is comprised of helically wound filaments that are partially insulated (page 9, lines 15-19). As a result of this helical construction, upon radial expansion of braided conductive member, the portions of filaments that are uninsulated do not contact adjacent filaments and thus, each filament remains electrically isolated from every other filament (page 9, lines 16-19).

When the braided conductive member is in the disk-like configuration, the uninsulated portions of the braided conductive member may be used to create an annular lesion at or near the ostium of the heart (page 26, lines 17-19). Specifically, external pressure may be applied along catheter shaft to achieve the desired level of contact of braided conductive member with the ostium tissue (page 26, lines 15-17). Energy is then applied to the ostium tissue in contact with braided conductive member to create the annular lesion (page 26, lines 17-19).

The above summary of one aspect of the present invention is provided merely for the Examiner's convenience, and is not intended to characterize any of the independent claims. Therefore, the Examiner is requested to not rely upon the summary characterization above, but to closely examine each of the independent claims to ensure that each distinguishes over the references of record for the reasons discussed below.

b. Discussion of Document D1

Document D1 discloses that an expandable-collapsible body 22 may be supported on a closed, three dimensional structure 44 formed by a resilient mesh 50 (Col. 10, lines 17-20). FIG. 6 illustrates the spherical, expanded geometry of the expandable-collapsible body 22 and FIG. 7 illustrates the collapsed geometry of the expandable-collapsible body 22 (FIGS. 6 and 7). According to one embodiment, the expandable-collapsible body 22, which is internally supported by a mesh structure 50, may be expanded or collapsed using a stilette 76 (Col. 12, lines 50-54). Pushing forward upon the stilette 76 extends the mesh structure 50 to

collapse the expandable-collapsible body 22 (Col. 12, lines 54-56). Pulling rearward upon the stilette 76 has the opposite effect, allowing the spline structure 46 or mesh structure 50 to assume its expanded geometry (Col. 12, lines 57-60).

c. Independent Claim 1

Independent claim 1, as amended, recites a catheter comprising a handle, a shaft portion coupled to a distal end of the handle, a tip portion, a braided conductive member coupled to the shaft portion and the tip portion, and a mandrel fixedly attached to the tip portion and slidably disposed within the shaft portion. Actuation of the mandrel expands the braided conductive member from an undeployed position in which the braided conductive member assumes a generally cylindrical configuration to a deployed position in which the braided conductive member assumes a disk-like configuration.

Document D1 does not disclose or suggest that actuation of a mandrel expands a braided conductive member from an undeployed position in which the braided conductive member assumes a generally cylindrical configuration to a deployed position *in which the braided conductive member assumes a disk-like configuration*. In addition, none of the other references of record discloses or suggests (alone or in combination) the catheter of claim 1.

In view of the foregoing, claim 1 distinguishes over Document D1. Claim 1 is also believed to distinguish over the other references of record, and is believed to satisfy the PCT requirements with respect to novelty and inventive step.

Claims 2- 27 depend from claim 1 and are believed to satisfy the PCT requirements with respect to novelty and inventive step for at least the same reasons.

C. New Claims

Claims 66-70 have been added to further define Applicant's contribution to the art. Newly added claims 66-70 are supported in the application as filed e.g., at page 9, line 8 – page 10, line 9 and FIG. 34A. These new claims are believed to patentably distinguish over the references of record.

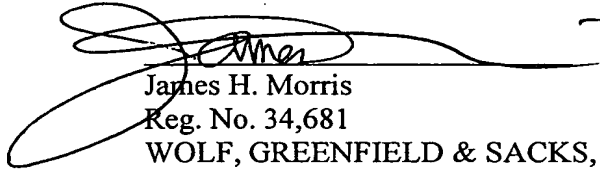

D. Conclusion

A favorable International Preliminary Examination Report in response is requested.

If for any reason this response does not place the application in condition for issuing a favorable International Preliminary Examination Report as to all claims, Applicant requests

issuance of a further Written Opinion and an opportunity to respond thereto prior to issuance of the International Preliminary Examination Report. Should there be insufficient time available for issuance for a further Written Opinion, Applicant requests the IPEA to initiate a telephone interview at Applicant's expense, and an opportunity to file a Supplemental Response to the previous Written Opinion by return fax, pursuant to PCT Article 34(2).

Respectfully submitted,

James H. Morris
